

NAS100 London Range bot — Add To Winner results (trigger 0.7)

Prepared for Vanessa, 30 September 2026. Backtest 1 Jan 2021 – 28 Sep 2026, \$100,000 account, \$300 risk per trade, tick data, risk reduction to 70% at 0.7R, TP 4R. Control = the live bot with Add To Winner switched off. Sizes 1–4 are your real cTrader runs; sizes marked * are simulated from the size-1 run (the add profits scale exactly with size — checked against your real size 3 and 4 runs to within \$50).

1. At a glance

	Total risk after add	Net profit 2021–26	Increase vs control	Years beating control	cTrader max equity DD	Deepest drawdown (closed days)	Worst single day	Chance of hitting \$90k in next 12 months*	Typical 12-month profit*
Control	0.70R	\$31,412	—	—	4.04%	\$4,333 (4.3%)	-\$415	0.0%	\$5,054
Size 1	1.00R	\$37,337	+\$5,926 (+18.9%)	6 / 6	4.65%	\$5,145 (5.1%)	-\$415	0.2%	\$5,782
Size 2	1.30R	\$42,609	+\$11,198 (+35.6%)	6 / 6	5.22%	\$5,960 (6.0%)	-\$496	0.6%	\$6,453
Size 3	1.60R	\$47,874	+\$16,462 (+52.4%)	6 / 6	5.78%	\$6,784 (6.8%)	-\$598	1.3%	\$7,164
Size 4	1.90R	\$53,162	+\$21,750 (+69.2%)	6 / 6	6.32%	\$7,613 (7.6%)	-\$702	2.7%	\$7,992
Size 5*	2.20R	\$58,374	+\$26,963 (+85.8%)	6 / 6	~6.9%	\$8,418 (8.4%)	-\$803	4.3%	\$8,793
Size 6.5*	2.65R	\$66,263	+\$34,852 (+111.0%)	6 / 6	~7.7%	\$9,653 (9.7%)	-\$957	6.7%	\$10,115

* From today's balance of \$96,952 using your risk ladder with the 4-loss rule (see section 4). cTrader max equity DD for simulated sizes is extrapolated from sizes 1–4. All money figures in sections 1–3 are at \$300 risk; at \$500 multiply by 1.67.

2. Profit year by year (at \$300 risk)

Year	Control	Size 1	Size 2	Size 3	Size 4	Size 5*	Size 6.5*
2021	\$4,329	\$5,312 +\$982 (+22.7%)	\$6,309 +\$1,980 (+45.7%)	\$7,306 +\$2,976 (+68.8%)	\$8,305 +\$3,976 (+91.8%)	\$9,284 +\$4,955 (+114.5%)	\$10,774 +\$6,445 (+148.9%)
2022	\$9,332	\$10,451 +\$1,119 (+12.0%)	\$11,634 +\$2,302 (+24.7%)	\$12,818 +\$3,486 (+37.4%)	\$14,003 +\$4,671 (+50.1%)	\$15,164 +\$5,832 (+62.5%)	\$16,932 +\$7,600 (+81.4%)
2023	\$4,024	\$4,564 +\$540 (+13.4%)	\$5,133 +\$1,109 (+27.6%)	\$5,702 +\$1,678 (+41.7%)	\$6,273 +\$2,249 (+55.9%)	\$6,836 +\$2,812 (+69.9%)	\$7,688 +\$3,664 (+91.0%)
2024	\$4,519	\$4,875 +\$356 (+7.9%)	\$5,246 +\$727 (+16.1%)	\$5,612 +\$1,093 (+24.2%)	\$5,988 +\$1,468 (+32.5%)	\$6,362 +\$1,842 (+40.8%)	\$6,919 +\$2,400 (+53.1%)
2025	\$4,708	\$5,464 +\$757 (+16.1%)	\$6,224 +\$1,516 (+32.2%)	\$6,982 +\$2,274 (+48.3%)	\$7,742 +\$3,034 (+64.5%)	\$8,499 +\$3,791 (+80.5%)	\$9,637 +\$4,929 (+104.7%)
2026 (to 28 Sep)	\$4,499	\$6,671 +\$2,172 (+48.3%)	\$8,063 +\$3,564 (+79.2%)	\$9,454 +\$4,955 (+110.1%)	\$10,851 +\$6,353 (+141.2%)	\$12,229 +\$7,730 (+171.8%)	\$14,313 +\$9,814 (+218.2%)
Total	\$31,412	\$37,337 +\$5,926 (+18.9%)	\$42,609 +\$11,198 (+35.6%)	\$47,874 +\$16,462 (+52.4%)	\$53,162 +\$21,750 (+69.2%)	\$58,374 +\$26,963 (+85.8%)	\$66,263 +\$34,852 (+111.0%)
Smallest yearly gain over control	—	+\$356	+\$727	+\$1,093	+\$1,468	+\$1,842	+\$2,400
Profit made by the adds	—	\$5,259	\$10,532	\$15,796	\$21,084	\$26,297	\$34,186

Green = extra profit compared with the control in the same year. Every size beat the control in every year.

3. Winning days and losing streaks (main trade + add counted as one day)

	Trading days	Winning days	Daily win rate	Losing days per winning day	Longest losing run (days)	Losing runs of 4+ days	Deepest drawdown at \$300	Deepest drawdown at \$500
Control	634	229	36.1%	1.77	11	33	\$4,333	\$7,221
Size 1	634	228	36.0%	1.78	11	34	\$5,145	\$8,574
Size 2	634	227	35.8%	1.79	11	34	\$5,960	\$9,934
Size 3	634	225	35.5%	1.82	11	35	\$6,784	\$11,307
Size 4	634	225	35.5%	1.82	11	35	\$7,613	\$12,689
Size 5*	634	224	35.3%	1.83	11	35	\$8,418	\$14,031
Size 6.5*	634	221	34.9%	1.87	11	36	\$9,653	\$16,088

The add does not change how often you win or how long losing streaks last — it only makes the winning days bigger and the losing days slightly bigger (because the add sometimes stops out too).

4. Risk of hitting FTMO's \$90,000 floor (blowing the challenge)

5,000 simulated futures built from real runs of 10 consecutive trading days, so real losing streaks stay intact. NAS100 bot on its own — the US500 bot will add its own risk. **Your ladder:** \$104k+ → \$500, \$98k+ → \$400, \$95k+ → \$300, below → \$200; one level lower after 4 losing days in a row until the next winning day.

	From \$96,952: fixed \$300	From \$96,952: fixed \$500	From \$96,952: your ladder	Increase in risk vs control (ladder)	Over 3 years (ladder, approx.)	Fresh \$100k (e.g. after a payout): ladder	Bad year, 1 in 10 (ladder, from \$96,952)
Control	0.8%	6.4%	0.0%	–	0.1%	0.0%	-\$1,703
Size 1	1.5%	9.4%	0.2%	+0.2 points	0.7%	0.0%	-\$1,980
Size 2	2.7%	13.1%	0.6%	+0.6 points	1.9%	0.1%	-\$2,219
Size 3	4.2%	16.3%	1.3%	+1.3 points	3.8%	0.2%	-\$2,414
Size 4	6.2%	20.3%	2.7%	+2.6 points	7.8%	0.6%	-\$2,591
Size 5*	7.9%	23.9%	4.3%	+4.2 points	12.2%	1.2%	-\$2,873
Size 6.5*	11.0%	28.8%	6.7%	+6.7 points	18.8%	2.5%	-\$3,281

5. Typical profit over the next 12 months (median of the simulations, from \$96,952)

	Fixed \$300	Fixed \$500	Your ladder	Increase vs control (ladder)	Replay 2021–26 with ladder from \$100k: final balance	Replay: deepest drawdown
Control	\$5,158	\$8,597	\$5,054	—	\$148,899	\$6,853
Size 1	\$5,998	\$9,996	\$5,782	+\$729 (+14.4%)	\$158,270	\$7,870
Size 2	\$6,815	\$11,358	\$6,453	+\$1,400 (+27.7%)	\$166,284	\$9,136
Size 3	\$7,600	\$12,667	\$7,164	+\$2,111 (+41.8%)	\$173,983	\$10,404
Size 4	\$8,443	\$14,071	\$7,992	+\$2,938 (+58.1%)	\$182,463	\$11,671
Size 5*	\$9,266	\$15,443	\$8,793	+\$3,739 (+74.0%)	\$190,165	\$12,899
Size 6.5*	\$10,518	\$17,530	\$10,115	+\$5,061 (+100.2%)	\$202,656	\$14,785

6. How to read this, in plain English

- **Profit goes up in a straight line with size.** Each extra step of add size adds roughly \$5,300 over the 5¾ years at \$300 risk (about \$8,800 at \$500). It beat the control in every single year, at every size.
- **Risk goes up faster than profit at the big sizes.** The chance of hitting \$90k stays tiny up to size 3, then climbs: each extra size step costs more risk than the one before.
- **Risk adds up over time.** A 3% chance per year is roughly a 9% chance over three years. The US500 bot will add its own risk on top, so the combined account needs a single budget. Suggested: no more than 2–3% a year chance of hitting \$90k for both bots together.
- **Win rate and losing streaks don't change.** About 36% of days win at every size, and the longest losing run stays at 11 days. What changes is how much a bad run costs.
- **The ladder is what keeps you safe.** Dropping risk as the balance falls cuts the chance of hitting \$90k sharply compared with a fixed \$500 (size 3: about 16% down to about 1%) — see section 4.
- **Settings for sizes above 4.33:** raise 'Max Total Risk' to at least the 'total risk after add' figure (size 5 → 2.2, size 6.5 → 2.7), otherwise the add gets capped.
- **Caveats:** backtests are not guarantees; strategies usually earn less after going live. The simulations reuse 2021–26 behaviour — a new kind of market could be worse. Sizes 5 and 6.5 are simulated; today's size 6.5 run will confirm them. Please double-check with FTMO that a payout resets the balance to \$100k with the floor staying at \$90k.
